Ordering Information

PRICES are F.O.B. nursery at Painesville, Ohio, and include careful loading, with damp packing material, on trucks or trailers. Any necessary boxing or wrapping is charged at near cost. This list is based on current conditions and is subject to market and economic changes.

PAYMENT TERMS. Open account is available to firms having an established credit record for prompt payment. New accounts should furnish 3 or 4 trade references and allow time for checking. Credit terms are net 30 days, but 2% discount is awarded for payment in 10 days from invoice date.

Cash with order merits 2% discount. Be sure to include enough to cover packing (average 10%) so as to eliminate C.O.D. costs. Overpayments returned promptly.

C.O.D. orders must be accompanied by at least 1/3 of the total amount of the order, and take no discounts.

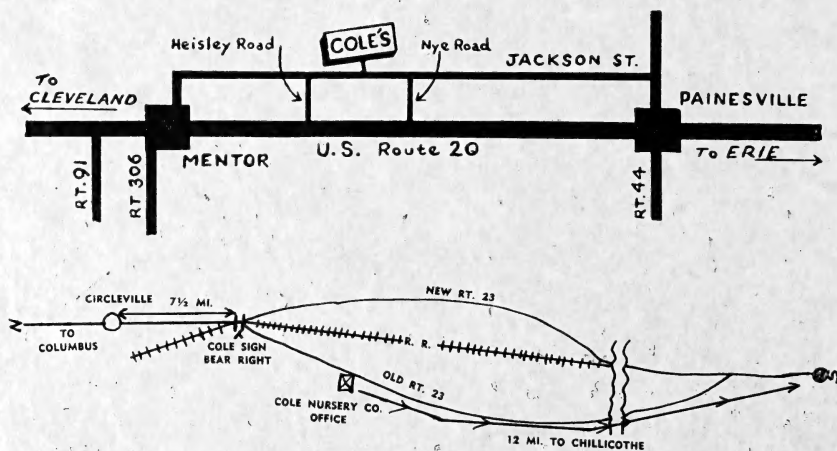

SHIPMENTS travel at expense and risk of purchaser. Where damage or delay occurs in shipment, you should make claim to transportation company at once. **Please** specify routing of your shipments and method you prefer. Where no instructions are given, we will ship according to the situation, as we think best serves your interest.

GUARANTEE. All stock is guaranteed true-to-name and in good healthy condition, but we assume no responsibility after it leaves the nursery. We give no warranty, expressed or implied, as to productiveness or growth and will not in any way be responsible for the results secured in transplanting. It is mutually agreed that our liability for any errors or other causes is confined to free replacement or refund of purchase price.

CLAIMS for errors, rejections, shortages, or any other reason will be entertained only if made within 5 days after arrival of goods.

TRUCKING. During planting season, our trucks make frequent deliveries to Cleveland, Columbus, Cincinnati, Chicago, Detroit, Buffalo, Pittsburgh, Philadelphia and Rochester areas. Trucking can easily be arranged to other cities within 600 miles of Painesville. Rates reasonable.

HOW TO FIND US

An Invitation

You're always welcome at Cole's. We are located East of Cleveland, halfway between Mentor and Painesville, on Jackson Street. U. S. Route 20 passes one block south of our office.

Our new 800-acre nursery, on Route 23 south of Circleville, Ohio, is exceeding all expectations. Bob Cole will be glad to show you around.

COLE'S ROYAL FAMILY OF TREES

A SELECT LIST OF CHOICE NEW TYPES

AND THE MOST POPULAR STANDARDS

Cole's has long been known for producing the finest trees for all markets. Continuous research for improved varieties and production methods has resulted in our present leadership in this field. Planted in seven-foot rows, our trees have ample room for proper development of root, body, and top. Because all digging and root-pruning is done mechanically, you benefit by a **vastly superior root system** and consequent transplanting success.

NOTES

The size immediately following the name is the estimated practical height at maturity, under local cultural conditions.

Where an item is usually moved with a ball of earth, we indicate the recommended B&B size after the listing, thusly: 4 to 5 ft. (15" Ball), and the price includes balling charges. Should earth balls be desired on other items, prices and weights are listed opposite page 48.

Although caliper listings of trees are also indicative of top development, we imply no relationship of this measurement to height. This is entirely subject to differences in varieties and cultural practices.

Cole's

Wonderful New Honeylocusts

THE MOST WIDELY ADAPTABLE NEW TREES ON THE MARKET TODAY

After years of experiment and study on more than ten thousand individual trees and further close observation and tests with two hundred and sixty early selections, Cole now presents a whole new family of Thornless Honeylocusts. Each tree was selected with a specific form and purpose in mind. First came the spectacular Golden Sunburst, already becoming familiar in all parts of America. Now the exceedingly handsome Skyline and Imperial join their glamorous partner to form the world's finest series of new trees.

IMPERIAL Locust — Plant Patent No. 1605
The ultimate in graceful spreading shade trees.

IMPERIAL LOCUST

(Plant Patent No. 1605)

Cole's new IMPERIAL locust is an exceptionally graceful, spreading variety that is destined for recognition as one of the outstanding trees of this age. Branches are symmetrically arranged, forming a much more regular and compact tree than other Honeylocusts. It grows straight and strong **Without staking** and produces a dense and uniform crown with a minimum of trimming in the nursery.

Numerous, well-spaced branches emerge from the trunk at nearly 90-degree angles thereby assuring strong crotches. The prolific branching results in a uniform, fairly broad, yet compact head. Even small nursery trees, as young as two years old, have the appearance of rather mature specimens.

The foliage is dainty and refined and has a fresh green color. Leaves are spaced closer than on the Common Honeylocust and, because of the dense branching habit, form a more dense cover.

SUNBURST Locust
Plant Patent No. 1313

SKYLINE Locust
Plant Patent No. 1619

SKYLINE LOCUST (Plant Patent No. 1619)

Cole's new Skyline locust is a stately and unusual variety with distinctive pyramidal form. It develops an exceptionally strong, sturdy trunk and shapely crown **without being staked or specially trimmed**.

Branches are uniformly spaced and arranged, resulting in a well-filled tree of rather formal appearance. Strong crotches result from the wide angle—60 to 90 degrees—at which the branches diverge from the trunk.

The leaves of SKYLINE are dark green and of a heavy, leathery texture. They are more closely spaced, and the leaflets are larger than the average Honeylocust produces, thereby contributing to the compact appearance of the crown.

Practically all of the flowers produced are male; but infrequently a polygamous flower has appeared in which a single floret is female. Since only a small percentage of these female florets are pollinated, seeding is of minor importance.

MAJESTIC LOCUST

Plant Patent No. 1534

A strong, graceful tree of spreading growth habit, Majestic is much more regular and compact than the ordinary Honeylocust. It is entirely thornless and grows straight without staking.

The bold, abundant foliage is extremely dark green when mature, retains its richness even in drought or wet soils. Flowers are occasionally polygamous, but seeding has been relatively light.

NEW SUNBURST LOCUST

(Plant Patent No. 1313)

The first new color in a hardy ornamental shade tree in decades. Bright golden foliage on 8 to 10 inches of branch tips, contrasts with the rich green of the balance of the tree; appears to be in bloom all summer.

Broadly pyramidal head and excellent branching habit creates a beautiful symmetry unmatched by other honeylocusts.

PLANTS FOR THAT PROBLEM AREA

For your guidance, we have listed recommended plants for special purposes and problem areas on pages 47 and 48. These lists were made up from the collective experience of many horticultural experts. Cole's hope you will find them useful.

EACH RATES in this catalog are for the accommodation of customers who place substantial orders, yet need small amounts of certain items to fill out their plantings. We do not have the facilities to handle orders calling entirely for small quantities of stock.

DECIDUOUS SHRUBS

WHY BETTER SHRUBS?

Because Cole's shrubs are "normal grown" under Northern Climatic conditions. They aren't forced by big doses of fertilizer, consequently have full tops with body and substance, plenty of spreading, fibrous roots. Long, cool fall seasons mean they are properly ripened for your transplanting success.

The size immediately following the name indicates approximate height at maturity, in cultivation.

WHY BETTER SHRUBS?

Because Cole's shrubs are "normal grown" and Northern grown. They aren't forced by big doses of fertilizer, consequently have full tops with body and substance, plenty of spreading, fibrous roots. Long, cool fall seasons mean they are properly ripened for your transplanting success.

NEW Tallhedge

COLUMNAR BUCKTHORN

(Luedy)

Rhamnus frangula columnaris

Plant Patent No. 1388

Here, at last, is a perfect solution to many hedge problems. TALLHEDGE forms a compact, narrow hedge up to 12 to 15 feet tall, and only about 4 feet wide. It need never be trimmed to be neat, but may easily be sheared to as low as 4 feet.

Foliage is dense, lustrous dark green. Attractive berries change through cream, pink and red to black, appear in succession all summer.

Cole's TALLHEDGE is a form of the highly respected thornless, hardy and adaptable Glossy Buckthorn. It fills a long-standing need for a good, tall, narrow hedge or accent plant.

in these new Cole Originals developed to
fit your landscape plans and your budget

IMPERIAL® (Plant Pat. 1605) A naturally graceful, spreading variety with dainty, refined foliage and fresh green color. It looks mature even when young and grows rapidly to about 35 feet.

MORE than 20 years ago D. B. Cole set out to improve the characteristics of the thornless Honeylocust (*Gleditsia triacanthos inermis*) while retaining all of the best features of the species. Some of the successful results of his intensive program are illustrated here. Each of these patented new trees is far superior to any previous variety and each serves a specific purpose in modern landscaping plans. They are easily transplanted and quickly make a substantial showing. These are economical trees from the standpoint of price, planting cost and extremely low maintenance and replacement cost. All three are strong and hardy, widely adaptable as to soil and climate, and highly resistant to disease, insects and storm damage.

Cole Nursery's 1000-acre mechanized operation assures you healthy plants, delivered in good condition. We can supply your needs in large quantity and wide variety from our list of 360 items. Write for our current catalog and the name of your nearest licensed grower of patented Cole trees.

OHIO'S LARGEST WHOLESALE NURSERY

R. D. No. 1, Circleville, Ohio 43113

MAJESTIC (Plant Pat. 1534) A clean, graceful, symmetrically-branched tree. Produces a straight, sturdy trunk and compact crown without staking or special trimming. Ultimate height 60 to 65 ft.

SKYLINE® (Plant Pat. 1619) Symmetrical, upright type with formal pyramidal crown. Dark green foliage has a heavy, leathery texture. Mature height about 45 feet.

This five-year-old SUNBURST (*Gleditsia triacanthos inermis aurea*) is 12 feet tall. It will grow rapidly to a height of 30 to 35 ft.

ANOTHER NEW
COLE ORIGINAL

This spectacular
TWO-COLOR
ornamental adds a
dramatic new accent
to any landscape

BRIGHT golden yellow foliage on every branch tip contrasts sharply with deep rich green inner foliage to make SUNBURST Honeylocust look like a flowering tree, bursting with bloom, all summer long. But the striking beauty of SUNBURST is only one of the reasons we say it is the finest ornamental shade tree you can plant.

SUNBURST is easy to transplant and requires very little maintenance. Its rapid growth quickly makes a colorful showing. With excellent branching habit, SUNBURST develops a broadly pyramidal head and stately form. Mature height is 30 to 35 feet. It can be severely pruned to

reduce its stature, responding with greater density and increased coloration.

SUNBURST is an ideal lawn tree because it creates no maintenance problem, causes no ground litter and its lacy, sun-dappled shade is actually beneficial to grass.

Professional test plantings at arboretums and horticultural colleges, and thousands of successful landscape plantings prove Cole's SUNBURST Honeylocust is extremely hardy and vigorous in almost any kind of soil or climate. One of the strongest trees known, it readily survives ice, snow, windstorm, drought and poor drainage.

You are cordially invited to visit our Circleville headquarters and our Painesville, Ohio nursery during the summer season (May 15—August 15). We will be glad to show you our 1000-acre facilities, modern, mechanized equipment and some 360 varieties of trees and nursery stock.

plantings*

SNOWDRIFT—Has the best form and finest growth habit of any variety. Large, pure white flowers, extremely disease-resistant green leaves and tiny $\frac{1}{8}$ " orange-red fruit.

REDBUD (zumi Calocarpa)—Disease-resistant green leaves. Pink buds. Abundant annual bloom of pale pink to white flowers. Glistening red $\frac{1}{2}$ " fruit. Upright, spreading form. 10-15'.

KATHERINE—Large, profuse double pink to white flowers cover slender branches. Green leaves. Small $\frac{1}{2}$ " reddish-green fruit. A spreading, graceful tree. Grows upright to 15 feet.

PRAIRIE ROSE—Large fragrant, fully double, rose-pink flowers like roses on a tree. Dense green foliage. Apparently fruitless. Blooms later, thus extending the flowering season.

VAN ESELTIME—Very upright when young, becoming beautifully vase-shaped. Large, double, rose-pink flowers suggesting a flowering cherry. Green leaves. Pale yellow $\frac{1}{8}$ " fruits.

RADIANT—Top-ranking Minnesota introduction. Deep pink flowers, green foliage, bright red $\frac{1}{2}$ " fruit. Upright habit. Excellent companion tree for Snowdrift in colorful plantings.

DOROTHEA—Lovely, $1\frac{1}{2}$ " bright pink, semi to double flowers. Young plants bloom abundantly. Green foliage. Spreading, rounded form. Fruit $\frac{1}{2}$ " plus. Choice variety.

LISET—New Dutch variety with beautiful, dark red flowers. Begins blooming when young. An upright, refined tree. Reddish-purple $\frac{1}{2}$ " fruits. Leaves purplish, then dark green.

CORALBURST—(Pat. App. for) Entirely new color. Coral-pink buds open to double, rose-pink flowers. Dark green foliage, small yellow or russet fruit. Ideal container item. Resists scab, mildew and fireblight.

LEMOINEI—Vigorous and upright. One of the best red-flowered French Hybrids. Dark red $\frac{1}{2}$ " fruits. Deep purplish foliage matures to dark green.

TSCHONOSKI—A remarkable ornamental tree. Columnar when young; matures to a compact pyramid. Multi-colored fall foliage. For specimen, tall screen or tree lawn planting.

RED JADE—(P.P. 1497) Excellent weeping variety. White flowers. Bright red $\frac{1}{2}$ " fruit persists after leaves drop. Choice as a specimen, but suitable for containers and training to various forms.

BALLING SCHEDULE

In this catalog, where ball sizes are shown, viz., (15" Ball), etc., the price includes a definitely superior job of balling, burlapping and securely rope-tying roots. Sizes and weights are listed for your guidance in estimating shipping weights, and are only approximate; varieties and soil conditions cause them to vary.

Where customer requires balls on shrubs, trees and plants not catalogued as above, the following charges will be added to the listed price of the plant:

WHOLESALE ONLY

The Cole Nursery Company is strictly a wholesale establishment, specializing in high quality woody ornamentals. To better serve persons entitled to trade prices, all retail business was discontinued some years ago.

Because of this, we have neither personnel nor facilities to handle orders, from any source, calling entirely for small quantities of stock. Each rates are published only for the accommodation of wholesale buyers needing small lots of certain items to complete their lists.

By specializing our efforts, we are able to furnish the finest quality available, at competitive prices, with service you will appreciate.
